1. Introduction and System Purpose

The Internship Logging and Evaluation System (ILES) is a web-based platform used to manage internship placement requests, weekly internship logbooks, supervisor feedback, evaluations, and final results. The system supports clear tracking from placement request to final grade publication.

- Students submit internship placement details and weekly logs.
- Internship administrators review placement requests and assign supervisors.
- Academic supervisors and workplace supervisors review weekly logs and provide marks or comments.
- Students view feedback, assessed weekly log marks, performance trends and final results.
- Administrators monitor student progress, assessments and final results.

Important

The system enforces business rules to prevent duplicate placement requests, duplicate weekly logs for the same week, and duplicate feedback from the same supervisor on the same weekly log.

2. User Roles and Access

Role	Main Purpose	Key Pages
Student Intern	Submits placement details, writes weekly logs, views feedback, evaluations and final results.	Dashboard, My Placement, Submit Placement Details, My Weekly Logs, My Feedback, My Evaluations, My Results
Academic Supervisor	Reviews assigned students, reviews weekly logs, gives academic feedback and scores.	Dashboard, Companies, Student Weekly Logs, Feedback, Evaluations
Workplace Supervisor	Reviews assigned interns, reviews weekly logs, gives workplace feedback and scores.	Dashboard, Companies, Student Weekly Logs, Feedback, Evaluations
Internship Administrator	Manages users, placements, supervisor assignments, assessments and final results.	Dashboard, Users, Companies, Supervisor Assignments, Weekly Logs, Feedback, Evaluations, Assessments, Final Results

3. General Login and Navigation

3.1 Starting the System

1. Open the ILES frontend in the browser.
2. Choose the correct login option depending on your role.
3. Enter your username and password.
4. After successful login, the system opens the correct dashboard based on your role.

3.2 Navigation Bar

The navigation bar changes depending on the logged-in user. A student will not see administrator-only pages, while an administrator can access user, assessment and result management pages.

- Dashboard gives a summary of your current work.
- Role-specific buttons open the pages relevant to your tasks.
- The logged-in username and role appear on the right side of the navigation bar.
- Use Logout when you finish using the system.

4. Student User Guide

4.1 Student Dashboard

The Student Dashboard summarizes the student internship status. It shows the current placement, number of weekly logs, submitted logs, approved logs, feedback count, final mark and weekly performance trend.

Dashboard Item	Meaning
Current Placement	The company where the student is currently placed.
Weekly Logs	Total weekly logs created by the student.
Submitted Logs	Weekly logs that have been submitted for review.
Approved Logs	Weekly logs that have been approved by a supervisor.
Feedback Received	Total feedback entries received on weekly logs.
Final Mark	Final internship mark when available.

4.2 Submitting Internship Placement Details

5. Click Submit Placement Details.
6. Enter company details such as company name, location, email and phone.
7. Enter workplace supervisor details such as name, email, phone, title and department.
8. Enter internship period by choosing start date and end date.
9. Add student notes if necessary.
10. Click Submit Placement Details.

Placement Restriction

A student cannot submit another placement request if there is already a placement request or placement in the system. A new placement can only be submitted if the previous placement was rejected by the internship administrator.

4.3 Viewing My Placement

The My Placement page shows the student placement record, company details, placement status, internship period and workplace supervisor details. The student should check this page after submitting placement details to confirm whether the request is still pending or has been approved/rejected.

4.4 Creating a Weekly Log

11. Open the Student Dashboard or My Weekly Logs page.
12. Choose the correct placement if more than one placement is shown.
13. Enter the week number.
14. Enter the weekly log title.
15. Fill Monday to Friday activities.
16. Enter challenges and lessons learned.
17. Choose Save Draft to keep it editable, or Save & Submit to submit it immediately.

Weekly Log Restriction
Only one weekly log can exist for the same placement and week number. If Week 2 already exists, the system will not allow the student to create or submit another Week 2 log for the same placement.

4.5 Editing and Submitting a Weekly Log

- Draft logs can be edited before submission.
- Submitted logs cannot be edited or submitted again.
- When a log is submitted, the system records the submission date and time.
- Assigned supervisors can then review the submitted weekly log.

4.6 Viewing Feedback

The My Feedback page shows supervisor feedback for weekly logs. Each feedback entry includes the weekly log, student registration number, company, supervisor, decision, comment, score, feedback submission date and whether it is latest.

4.7 Viewing My Evaluations

The My Evaluations page shows weekly logs that have been assessed by both the academic supervisor and workplace supervisor. The final weekly log mark is calculated as the average of the two supervisor scores.

Field	Meaning
Academic Supervisor Score	Score given by the academic supervisor.
Workplace Supervisor Score	Score given by the workplace supervisor.
Final Weekly Log Mark	Average of academic supervisor score and workplace supervisor score.
Fully Assessed	Yes when both supervisors have submitted scores.

4.8 Viewing My Results

The My Results page shows the final internship result. The average weekly logs score is based on submitted weekly logs that have been fully assessed by both supervisors. If no fully assessed log exists, the result will show as unavailable or not yet ready.

5. Academic Supervisor User Guide

5.1 Dashboard

The Academic Supervisor Dashboard shows assigned students, weekly logs, submitted logs, approved logs, rejected logs, feedback given and academic evaluation records.

5.2 Reviewing Weekly Logs

18. Click Student Weekly Logs.
19. Review the student details, company, weekly log status and submission time.
20. Read Monday to Friday activities, challenges and lessons learned.
21. Check any existing feedback entries from supervisors.
22. Enter a decision, score and comment.
23. Click Submit Feedback.

Feedback Restriction

Each supervisor can submit only one feedback entry for each weekly log. After submitting feedback, the form is hidden and the system shows the submitted feedback details.

5.3 Academic Scoring

The academic supervisor score is used with the workplace supervisor score to calculate the final weekly log mark. A weekly log becomes fully assessed only after both supervisors submit their scores.

6. Workplace Supervisor User Guide

6.1 Dashboard

The Workplace Supervisor Dashboard shows assigned interns, assignments, weekly logs, pending reviews, approved logs, rejected logs, feedback given and workplace evaluations.

6.2 Giving Feedback on Weekly Logs

24. Click Student Weekly Logs.
25. Read the student weekly activities and internship progress.
26. Enter the score and comment.
27. Choose a decision such as Comment, Approve or Reject.
28. Click Submit Feedback.

The system automatically connects the feedback to the logged-in workplace supervisor. The supervisor does not need to enter a supervisor ID.

7. Internship Administrator User Guide

7.1 Dashboard

The Internship Administrator Dashboard summarizes total placements, pending requests, active placements, weekly logs, submitted logs, final results and student performance trends.

7.2 Reviewing Placement Requests

29. Open the Dashboard or Supervisor Assignments page.
30. Review submitted placement details including company, location, department and internship period.
31. Review workplace supervisor details submitted by the student.
32. Approve placement only, or approve and assign both supervisors.

7.3 Assigning Supervisors

- Assign one academic supervisor to the placement.
- Assign one workplace supervisor to the placement.
- The selected supervisor type must match the assignment role.
- The system prevents duplicate active supervisor assignments for the same role and placement.

7.4 Monitoring Assessments and Results

The administrator can open Users, Assessments and Final Results to view student performance, weekly log evaluations, final marks and placement details. The administrator can also view per-student performance trend graphs.

8. Workflow States and Meaning

State	Meaning	Who Triggers It
Placement Pending Approval	Student has submitted placement details and awaits administrator review.	Student
Placement Approved	Administrator has approved the placement request.	Administrator
Internship In Progress	Placement is active and weekly logging can continue.	Administrator/System
Log Submitted	Student submitted a weekly log for review.	Student
Pending Review	Supervisors have not completed review.	System
Reviewed and Approved	Supervisor approved a submitted log.	Supervisor
Reviewed and Rejected	Supervisor rejected a submitted log.	Supervisor
Evaluation Submitted	Evaluation components have been submitted.	Supervisor
Final Grade Published	Administrator publishes final result.	Administrator

9. Common Error Messages and Solutions

Message	Cause	Solution
You already submitted placement details.	The student already has a non-rejected placement.	Wait for administrator decision or submit again only if rejected.
Week already exists for this placement.	A weekly log for that week was already	Open My Weekly Logs and edit the

	created.	existing draft if it is still a draft.
This weekly log has already been submitted.	The student tried to resubmit a submitted log.	Submitted logs cannot be resubmitted.
You have already submitted feedback for this weekly log.	The same supervisor already reviewed the log.	View the existing feedback entry.
Only assigned supervisors can submit feedback.	Supervisor is not assigned to the placement.	Administrator should assign the supervisor first.
No assessed weekly logs found yet.	Both supervisors have not submitted scores yet.	Wait until both supervisors complete review.

10. Good Practice Checklist

User	Checklist
Student	Submit accurate placement details; create one log per week; submit logs on time; review feedback and results.
Supervisor	Review only assigned logs; provide clear comments; enter valid scores between 0 and 100; avoid duplicate feedback.
Administrator	Review placement requests carefully; assign both supervisors; monitor assessments; confirm final results before publication.
